

Some neighbors can really bug you.

Asian Longhorned Beetle ("ALB") is an invasive wood-boring pest that was discovered in Worcester, MA in August 2008. It is a huge threat to the trees that grow in our parks and along every street, and puts the livelihood of our state's forests as well as our nursery and maple syrup industries at risk.

Help us survey Boston's trees for signs of this invasive beetle. Learn how to recognize ALB and ALB tree damage, and what trees are most vulnerable. A brief training session will be held before the survey.

Our trees are counting on you!

Join the Beetle Battle:

Next survey:

Saturday, Nov. 14th, 9 am - 11 am

- Meet at intersection of Commonwealth Ave. Mall and Arlington St. (We'll be wearing ALB buttons)
- Wear comfortable shoes and bring water
- Call 617-626-1735 to register
- More ALB info at <http://massnrc.org/pests/alb>
- Rain date: Sunday, Nov. 15th
